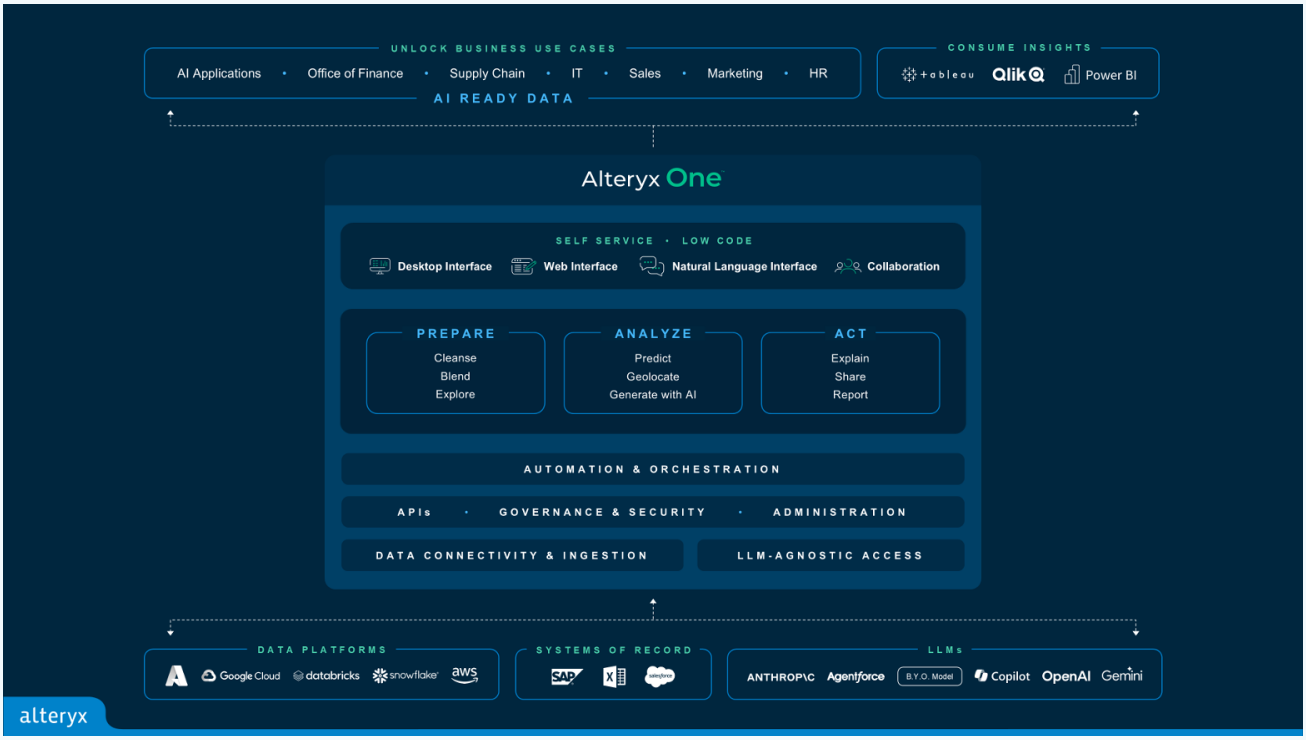
DATA SHEET

The Alteryx One Platform

Data is the backbone of every successful decision, and Alteryx One ensures your data is AI-ready with tools that simplify complexity and unlock smarter outcomes. This intuitive, low-code platform combines advanced **generative AI capabilities** with more than 300 tools to **cleanse, blend, and analyze data** effortlessly. Whether on cloud or desktop, your team can prepare data and derive insights quickly, enabling faster, smarter decisions without technical barriers.

More than just a tool, the Alteryx One platform transforms workflows into powerful, AI-driven pipelines. From workflow automation to generative AI capabilities like Alteryx Copilot, users of all skill levels can unlock and operationalize data's full potential. Organizations can **scale analytics** securely and efficiently, leveraging enterprise-grade governance and compatibility with a variety of cloud data platforms. Elevate your analytics maturity while ensuring compliance and collaboration, so your team can focus on making impactful, data-driven decisions.



alteryx

Get Your Data AI Ready

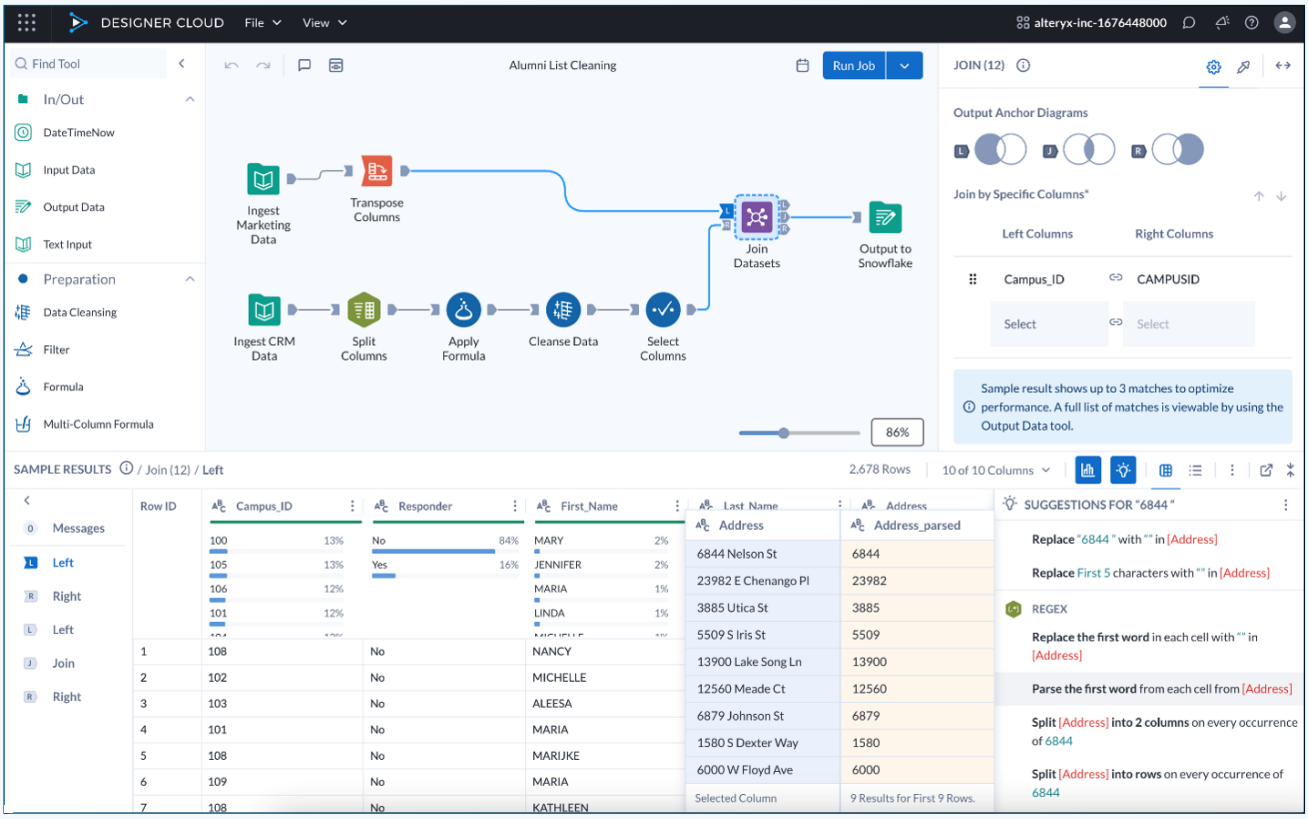
Alteryx One simplifies data preparation and analytics with intuitive tools, workflow automation, and scalable self-service capabilities, empowering teams to unlock faster, governed insights across cloud and desktop.

Prepare and Analyze Data with Ease

Unlock the full potential of your data with Alteryx One. With more than **300 code-free and code-friendly tools**, empower your team to cleanse, blend, and gain insights effortlessly.

Alteryx One lets you build once and automate workflows, modernizing data preparation, blending, and analytics. Whether you're using a **drag-and-drop desktop interface**, a **web interface**, or **natural language**, every analytic step is intuitive and efficient.

Choose to work in the cloud or on a desktop app, tailoring the platform to fit your unique business needs. With Alteryx One, data preparation is no longer a chore—it's a seamless step toward smarter, faster decision-making.



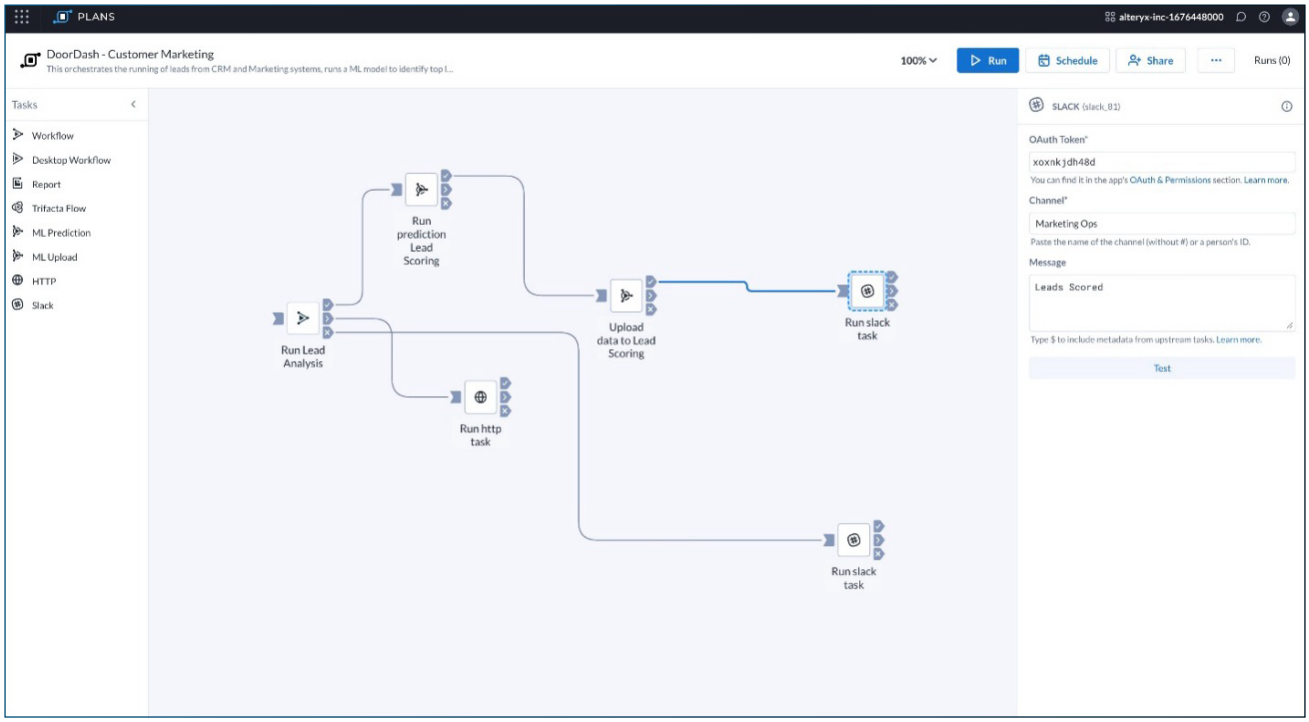
Cleanse, blend, and analyze your data with self-service, low-code interfaces offering 300+ pre-built analytics tools.

Automate and Orchestrate Data Pipelines

Transform the way your organization handles data with **data pipeline automation** built for scale, governance, and collaboration. Empower your team to design analytics workflows in the cloud and on desktop, enabling organization-wide access while maintaining robust controls.

Key features include the ability to **schedule and orchestrate workflows** for continuous answers, removing local and manual dependencies on end users. With advanced scheduling and secure sharing capabilities, insights can flow seamlessly across teams, ensuring consistency and compliance.

Enable true enterprise scalability with automation that accelerates analytics maturity, enhances collaboration, and drives self-service analytics company-wide. Don't just automate processes; unlock the full analytics potential of your team.



Deploy automated, scheduled, and governed workflows at scale for production analytics.

alteryx

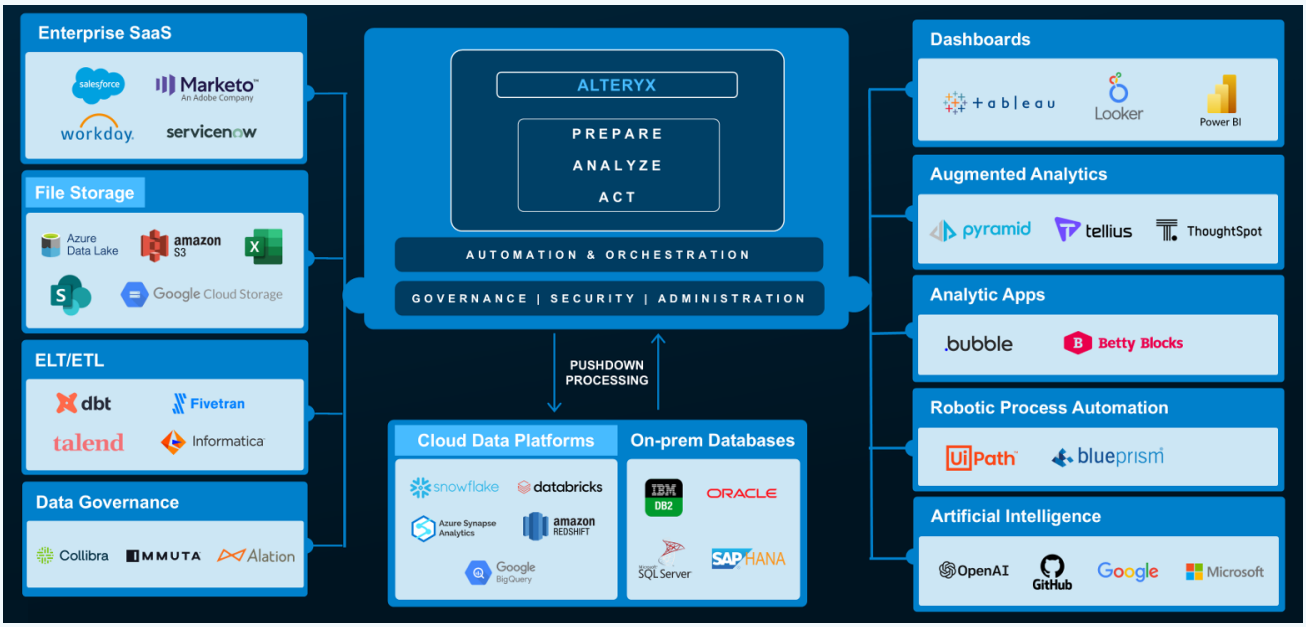
Simplify Access to All Your Data Platforms

Alteryx One seamlessly connects diverse data sources, integrates with major data platforms, including Databricks, Google, Snowflake, and more, and empowers teams to turn data into actionable insights without technical barriers.

Connect and Use Any Data, Anywhere

Seamlessly connect to data sources with **70+ pre-built connectors**, enabling access to critical data platforms, applications, and files, as well as BI tools and AI services, whether hosted in the cloud or on-premises. Alteryx One acts as an indispensable business access layer for enterprise data, uniting data from various sources to eliminate silos and enhance workflows.

Alteryx One's enterprise-grade connectors are designed for scale and security, ensuring seamless integration across diverse tools and platforms. Leverage **native pushdown capabilities** with data platforms to optimize performance, reduce data egress, and maximize your investment.



Connect to the enterprise and streamline analytics with Alteryx One.

alteryx

Leverage Key Data Ecosystem Partners

With deep technology integrations, Alteryx One empowers employees across the organization to harness best-in-class platforms like **AWS, Snowflake, Databricks, and more**, without the need for coding or technical expertise. By making powerful storage and compute resources accessible to everyone, Alteryx One ensures your business gets the most value from its data investments.

Key integrations make Alteryx One a vital part of the modern data stack. Teams can leverage data hosted in **AWS**, **Google Cloud**, **Databricks,** and **Snowflake**, **and Azure** through Alteryx One. Additionally, by pairing Alteryx with **Tableau**, users can transform clean, enriched datasets into compelling visualizations and reports to unlock insights with ease.

With Alteryx One, advanced cloud platforms become accessible, actionable, and effective for your entire organization.

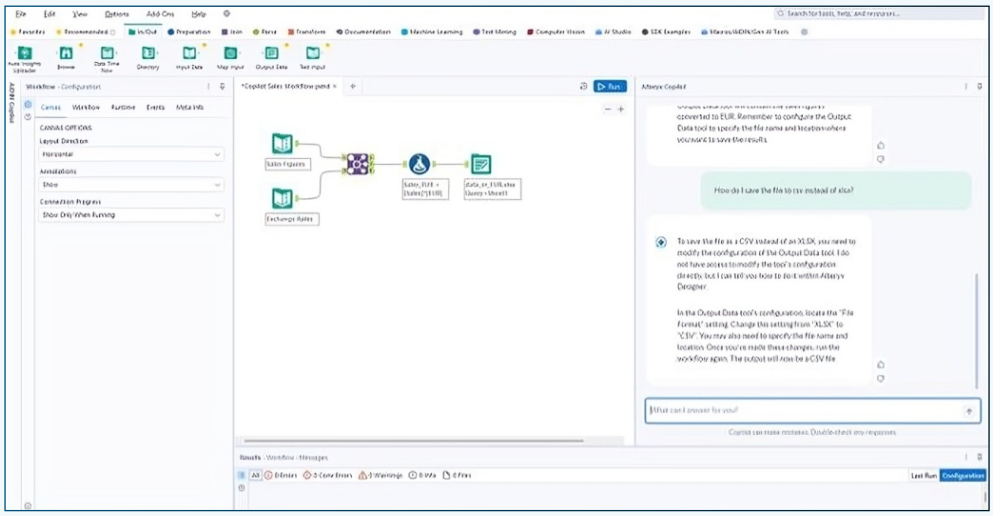
Drive Gen AI-Powered Outcomes

Alteryx One empowers your team to move from data to decisions faster by embedding generative AI into every step of the analytics process.

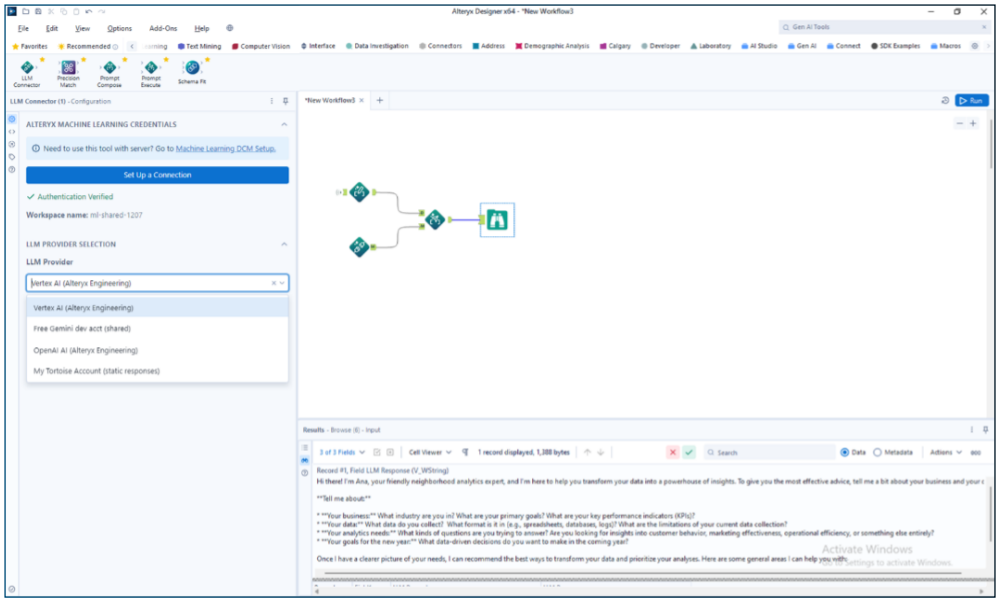
Accelerate insights, innovation, and impact by transforming how work gets built. With our generative AI copilot, anyone can create and optimize powerful analytics workflows using **natural language**. It turns ideas into actions by suggesting next steps, automating repetitive tasks, and placing tools directly onto the canvas to make the building process faster, easier, and more intuitive.

And with new generative AI-powered, **drag-and-drop tools**, you can clean and transform messy data with smart suggestions, connect to large language models your organization already trusts, and test responses in real time to fine-tune results.

By embedding generative AI directly into your workflows, Alteryx One helps your team achieve value faster, reduce manual effort, and **deliver insights you can trust**.



Your AI-powered analytics assistant makes data preparation and analysis even easier.



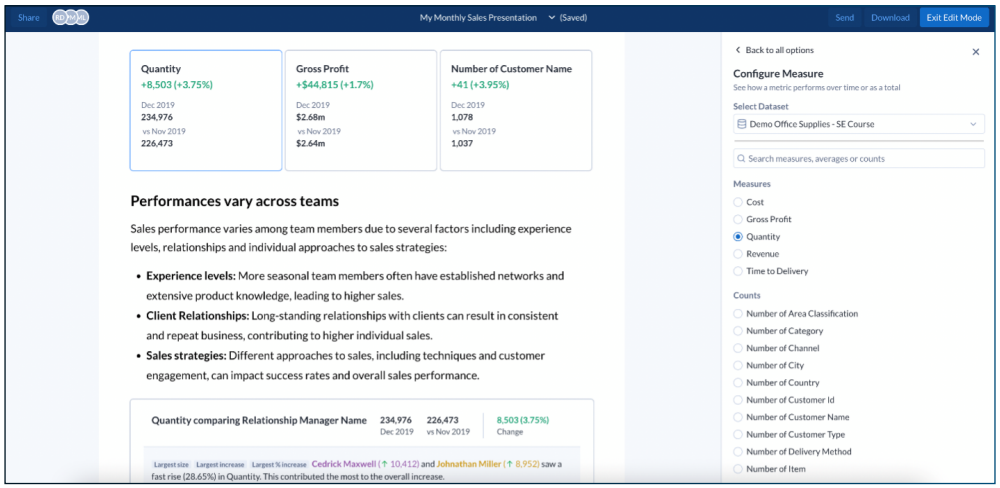
Prepare, standardize, and experiment faster with the LLMs you trust.

Automate Insights and Reporting for Smarter Decisions

Go beyond dashboards with Alteryx One's AI-infused, **code-free reporting and insights** capabilities. Designed to help business users **detect patterns**, **uncover trends**, **and tell data-driven stories**, the platform enables rapid insight sharing with just a few clicks. No coding or advanced analytics skills are required.

From **root cause analysis** to **automated presentations**, Alteryx One transforms raw data into impactful deliverables like automated reports, PowerPoint decks, or interactive data stories. It surfaces previously hidden signals, giving you a competitive edge. Flexible and industry-agnostic, Alteryx One makes advanced insights accessible to all, with enterprise grade AI that's reliable and secure.

Empower your team to work smarter and drive better outcomes with **AI-infused reporting and storytelling tools** that simplify complexity and elevate decision-making.



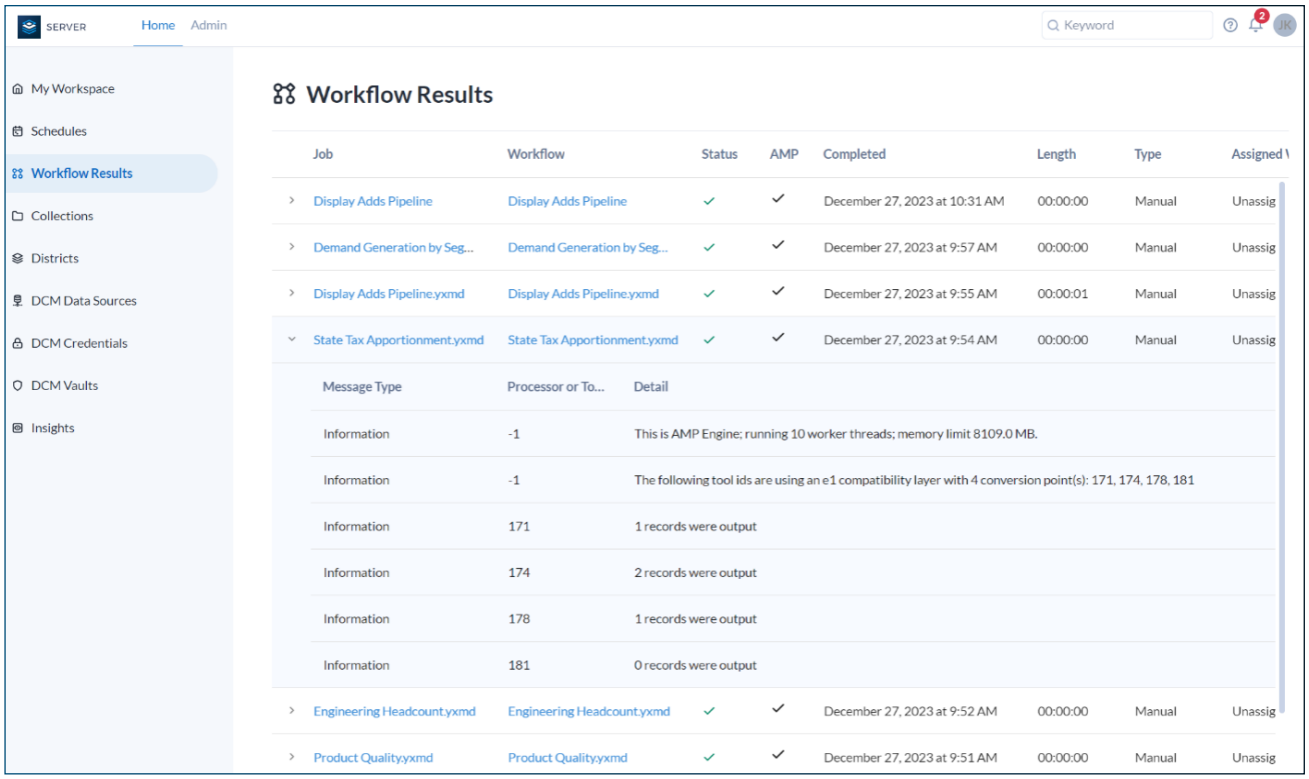
Explain and share discoveries for better decision making with automated insights and reports.

alteryx

Govern Analytics with Confidence

Alteryx One gives you control over your analytics at every level. Its **comprehensive data security framework** complies with industry-leading standards like SOC 2 Type II and ISO 27001, ensuring your data is always protected. By leveraging **AES-256 encryption**, **TLS protocols**, and **role-based security**, Alteryx One safeguards your sensitive information at rest and in motion.

Integration with systems like **Active Directory** and **Single Sign-On (SSO)** enables seamless user management, while role-based permissions ensure that data access aligns with job requirements. Whether it's **admin controls, service accounts**, or managing collections effectively, Alteryx One ensures that security isn't a separate process but an integral part of your analytics lifecycle.



Govern, share, and scale analytics pipelines for secure, automated outcomes.

Alteryx is a leading AI and data analytics company that powers actionable insights that help organizations drive smarter, faster decisions withAI-ready data. More than 8,000 customers around the world rely on Alteryx to automate analytics, improve revenue performance, manage costs, and mitigate risk across their businesses.
